The Count of Turin's were Gen. Count Avigardo de Quinto and the Marquis Carlo di Ginori.

By common accord the conditions were settled as follows: The weapon to be duelling swords, each combatant to use that of his own country, but the blades to be of equal length, either combatant to be at liberty to maintain the ground he gains, and each to be allowed the space of fifteen metres in which to advance or retire; each assault to continue four minutes; the combat to be resumed in the positions occupied, and only to terminate on the decision of the four seconds or the advice of the doctors when one of the adversaries is manifestly in a state of inferiority, the conduct of the metring to be intrusted alternately to the two parties, lots being drawn at commencement. This latter feature of the arrangement was due to formal objection of the seconds of Prince Henri of Orleans to direction of the encounter by a fifth party. At a later meeting yesterday the seconds decided upon the rendezvous.

The process-verbal then proceeds to describe the encounter. It says that in the first assault Prince Henri was hit in the right breast, although the weapon did not penetrate the thorax. On the strength of the report of the doctors, the seconds decided that the combat must go on.

The second assault was stopped because the combatants came into close quarters.

In the third assault the count of Turin was hit in the back of the right hand, but the wound was slight.

In the fourth assault the umpire, Maj. Leontieff, declared that the sword of Prince Henri was bent, and sloped before the first was hit in the back of the right hand, but the wound was slight.

In the fourth assault the umpire, Maj. Leontieff, declared that the sword of Prince Henri was bent, and stopped the engagement long enough to furnish the Prince with a new weapon.

In the fifth assault the combatants again got into close quarters, and were immediately stopped, Prince Henri in a counter-blow being hit in the right lower region of the abdomen. The doctors on both sides examined the wound and declared that Prince Henri was rendered by it clearly inferior to his antagonist.

Maj. Leontieff and M. Mourichon proposed that the combat be stopped, and this was done by common accord. While his wound was being dressed, Prince Henri, raising himself upon the ground, extended his hand to the Count of Turin, saying: "Allow me, monsinieur, to shake hands with you." The Count extended his hand to the Count of Turin, saying: "Allow me, monsinieur, to shake hands with you." The Count extended his hand.

The physicians present were Dr. Toupet and Dr. Hartmann on behalf of Prince Henri and Dr. Carle, on behalf of the Count of Turin. This account of the fighting was signed by the seconds.

The Temps says that the wound in the abdomen of Prince Henri serious, but not alarming. Had the Count of Turin's steel gone half a centimetre deeper, the intestines would have been perforated. After his wound had received a preliminary dressing, Prince Henri walked to his carriage unaided. The Count of Turin, accompanied by his seconds, left Paris for Italy this afternoon. He is not/experiencing any special distress from his wounds.

The meeting of the seconds yester-day was long and stormy. The representatives of Prince Henri stated in his behalf that he could not withdraw his original assertions, as he had written only the truth about the Italian officers and was entirely willing to give satisfaction to a representative Ital

[BY ASSOCIATED PRESS WIRE.]

PITTSBURGH, Aug. 15.—A leaden sky and fitful showers contributed to the feeling of depression which existed at the miners' camps at Turtle and Plum creeks today. The men huddles to gether for shelter under the commissary tents, and, having nothing else to do, put in the time'smoking and discussing the strike in all its phases. The spirit of aggressiveness, however, has largely died out. The same grim determination to stick it out until starvation brings defeat or victory is apparaent, but there are no propositions to strikes a strike in Fazette county. The plaintiffs in the case were six coal and coke companies, all of Fayette county. In each case an injunction was granted, the hearing of all the cases for a permanent injunction to dissolve the temporary injunction will be held in the same city on September 7, should the defendants so elect.

"The order is in every respect identical with the one issued upon the defendants from tresspassing upon the property of each of the principal stockholders of the Monagh Company against Debs and the strike leaders in the Fairmont region on July 28, and it in every way with their property, business or mines, either by tresspassing or efforts to induce the men to quit work. The order is a lengthy document, covering every material point asked for by the plaintiffs as fully as was done in the Sloan case."

The men all realize that in opposing the law, as represented by the sand his deputies, they would about the same success as in butting their heads against a stone wall. They have no particular love for the depu-ties, although there is an absence of that caustic repartee between the factions that has characterized former strikes.

There was no marching this morning. There has been the usual Sun-day custom at all the camps, but even if it had been otherwise the strict orders of all strike leaders to wait quietly until after Monday would have prevented them. Sunday has usually been used by the men to do missionary work among the working miners. None of them attempted to see any workmen, however, and kept severely away from

the company houses.

The situation at the Laughlin mill mine across the river has been straightened out by the declination of the miners to work as long as the campers are in the vicinity. MOUNT OLIVE (III.,) Aug. 15.-Interest in the strike situation has cen-tered here today. All day long prep-arations have been made to renew the siege at Coffeen. Citizens of this place who have been "held up" by the Coffeen authorities and not allowed to enter that town have employed attorneys to bring suits for damages. The litigation to follow promises to be as interesting as the strike itself. About fifty women, wives of miners from this and surrounding towns, are making arrangements to go to camp tomorrow. Their object will be to influence the wives of the miners there to prevail on their husbands to join in the demand for the scale of wages and to join the suspension.

however, and kept severely away from the company houses.

The march into Westmoreland county will begin as soon as the injunction is settled in court. Much anxiety is expressed as to the outcome. The men stake everything on their ability to show the right to assemble and march on the public road.

This afternoon there was a large mass-meeting at Plum Creek. About one thousand strikers and 200 miners from the Plum Creek and 200 miners from the Plum Creek. About one thousand strikers and 200 miners from the Plum Creek and the local leaders. The meeting was orderly, and there was no interference from the deputies.

There is a possibility of the customary march taking place in the early morning in spite of the strict orders issued by President Dolan against such a course. Some of the men are fretting under the restraint and Capt. Bellingham, who is in charge of the company, said tonight he had not decided whether to allow the march or not. The deputies are on the alert, and say they will arrest any who participate. Evictions from company, houses have begun. One family has already been evicted, and their household goods are on the roadside near Center. It is probable other evictions will take place tomorrow.

The Officer is Wounded but His Assailant is Killed-A Second Negro Slain Together with a White Man-Flight of the Darkeys.

[BY ASSOCIATED PRESS WIRE.] LITTLE ROCK (Ark.,) Aug. 15.—The loodiest race riot that has occurred in Arkansas in months took place this vening at Palarm Station, thirty miles from Little Rock. Three men are dead, another fatally wounded and two

others injured. The dead are: HARRISON KORR, colored, shot to CHARLES SOTERS, colored, killed

CHARLES ANDRY, white, shot hrough the heart.

The seriously injured are: T. CLARK, a telegraph operator, "sign" unknown,) shot through the

shoulder, probably fatally. D. R. OWENS, deputy sheriff of Perry county, shot through the groin, seriously.

Owens had a warrant for Korr, charged with murder. When he attempted to make the arrest at Palarm. Korr opened fire. The first shot struck Owens in the groin, inflicting a serious wound. Andry and Clark went to Owens's assistance, and five or six negroes joined in with Korr. A pitched battle ensued, in which over fifty shots were fired.

When the shooting was over Andry and Peters lay dead. Clark had gotten into his office and fallen to the floor from loss of blood. Owens was lying in a ditch near the station. Korr was found lying dead in the road, a mile away, literally shot to pieces. The other negroes fled, and have not yet been captured.

The whole county is in a fever of excitement, and should Korr's associates be caught, they will be lynched without trial.

SAN FRANCISCO, Aug. 15.—Nicholas Buja, the defaulting cashier, was returned here and locked in the city prison today. He confessed his guilt to Detective Gibson, but says the shortage in the accounts of Scatena & Co., his former employers, will not exceed \$5000. He begs to be left alone in his shame until he is sent to State's prison, for he expects no mercy.

On the left side of his neck, beneath the ear, is a long red mark. That was made with the handkerchief with which Buja tried to strangle himself in the jail at Santa Barbara, shortly after his arrest last Thursday. Buja is considered a splendid book-keeper, but riotous living caused his downfall.

Mrs. Winslow is the daughter of Dr A. B. Robbins, a prominent physician of Denver. She was formerly Mrs. Walter Marder. In Chicago a few years ago, she married the son of the president of the wealthy type-foundry firm of Marder, Luz & Co. After two years there was a suit for divorce cause of the attentions to Mrs. Marde by Dr. Winslow who had known her in Denver. Meanwhile Dr. Winslow married Miss Gussie Campbell of St Louis. Miss Campbell was formerly Mrs. William Spencer, but had been divorced and her maiden name restored. The wedding of Dr. Winslov and Miss Campbell had taken place in Chicago where the young doctor and Mrs. Marder met again.

Mrs. Marder met again.

Mr. and Mrs. Marder and Dr. and
Mrs. Winslow all returned to St. Louis.

Two months after Mrs. Marder was
granted a divorce, Dr. Winslow disappeared. Mrs. Marder also disappeared about the same time. Mrs. Winslow, formerly Mrs. Spencer, née
Campbell, brought suit for divorce and
it was granted her. Winslow, it seems,
had gone to Denver, the home of his
parents. Soon after Mrs. Winslow secured the decree, Mrs. Marder, who
since her divorce had assumed her
maiden name, Francis Robbins, came
to Kansas City, ostensibly to visit a
friend.

Twenty miles north of Pueblo hall fell in great quantities and drifted to a depth of three feet in some places, while covering the surface of the ground three inches. At Wigwam the tracks of the Denver and Rio Grande road were so damaged by water running over them two feet deep that trains between Col-orado Springs and Pueblo had to be sent over the Santa Fé Railway. The

Union Pacific, Denver and Gulf had a washout near the same place. Twenty miles south of Pueblo a cloudburst sent Salt Creek and the arroyos on a tear, and damaged a thousand feet of Denver and Rio Grande tracks, besides the approaches to several bridges. Trains will not be running before morning. Until the water subsides, the full extent of the

damage cannot be learned. Chico Creek, fifteen miles east of this city, is badly swollen and has carried out a county bridge, in addition to one span of the Missouri Pacific bridge, so that the train for St. Louis over that line, like the Gulf train for Fort Worth, is tied up here for the night. Further damage before morning is possible, since some of the streams are said to be rising. No rain has fallen in Pueblo, nor to the West.

LONDON, Aug. 15.—[By Atlantic

Discount rates. Discount rates advanced to 1%, the chief factors contributing to this being the decline in New York exchange and the rise of wheat in the United States with the certainty that Europe will take a large part of the American product. much excited, rates being quoted "subject to the rise in banking and land rates." The bank joined to an extent by calling in loans.

Gold remittances from the United States will soon begin, but are not expected to equal last year's record. There is a good demand for gold from Russia, but the metal is arriving from Australia and the Cape only.

Silver purchases for India are small. There is a general falling off of values in the stock market, which is depressed by the news from India and the unsettled condition of New York prices. The volume of business was much less than during the previous week, being confined for the most part to American railways, which were feverish. The principal transactions were in Union Pacific, Northern Pacific preferred, and Atchison, which were largely bought, and there was a good demand for second and third-class bonds. But the rise seems to have reached its limit, and realizations are likely to bring a material setback, if only temporarily. Canadians have fallen because of the general impression that the Klondyke is overdone, and Grand Trunk sympathizes.

Americans have diverted business from bome rails, which are uncommonly dull. The mining market settlement showed some expansion of speculative account, the carrying over rates amounting occasionally to 14 per cent. Africans were the features, but there was some buying of West Australians on Adelaide account.

JUSTICE FIELD'S TERM NOW THE LONGEST ON RECORD.

His Desire to Eclipse the Length of Service of Chief Justice Marshall is Accomplished Today-Resignation May Soon Follow.

(BY THE TIMES' SPECIAL WIRE.1 NEW YORK, Aug 15.—[Special Dispatch.] The Herald's Washington special says that Associate Justice Stephen
J. Field of the Supreme Court of the United States will tomorrow (Monday) break the record for continuous service on the Supreme bench, having served 34 years, 5 mos., 6 days, or one day longer than Former Chief Justice Marshall, whose record of service has hith-erto been the longest of all Justices since the establishment of the tribunal. It has been generally understood that Justice Field would retire from the Justice Field would retire from the bench when his length of service exceeded that of Former Chief Justice Marshall. It is probable that his seat upon the bench will become vacant soon. Upon his retirement, Atty.-Gen. McKenna, according to the present understanding, will succeed him.

COTTON CROP. Promises to Be Large in All States

But Texas. TRY ASSOCIATED PRESS WIRE.1 NEW ORLEANS (La.,) Aug. 15 .- H. M. Neill, the well-known cotton statis-

M. Nell, the well-known cotton statistician, has issued a circular on the growing crop. After referring to the correctness of his estimate made in July, 1834, of the crop of that season, Mr. Nelli says:

"At this moment, for this year, the promise is equal to any previous year in every State but Texas, and on the part of acreage, even allowing that Texas should fall short of her maximum product per acre by 1,000,000 bales, the outlook now is for a crop of at least 9,750,000, with 500,000 to 1,000,000 more within the range of possibilities. This figure of 9,750,000 is very conservative. If we soon have good rains in Texas her crop will also be hear perfection, and the possibilities for a total crop would then be something enormous."

Structural Steel Goes Up. Structural Steel Goes Up.

CLEVELAND (O.) Aug. 16.—An average advance of \$2 a ton in the price of structural steelshas been made at the mills in this city within the past three or four days and another advance is looked for. A representative of the Cleveland Rolling Mill Company said that he would not be surprised to see it go up \$2 a ton within the next thirty days.

one factor in the existing conditions.

The most important factor is the aug-

is in large part due to the improved

business conditions prevailing in the

United States, which improvement has

been brought about by the radical

change in our fiscal policy determined

upon at the last national election. Be-

cause of these improved business con-

SPECIAL MINING NUMBER.

At an early date The Times will publish an elaborate, carefully-prepared and informing issue devoted to exploiting the rich mining fields lying in the great Southwest, in almost every direction from the city of Los Angeles, which is the natural commercial metropolis and mineral entrepot of this vast region.

The forthcoming Mining Edition will contain a volume of valuable and timely information about the vielding and paying mines, as well as about the more promising of the prospecis in various mineral localities The aim will be to give correct and reliable information in every case, with a view to promoting the mining naustry as a legitimate pur suit.

Further information about this timely publication may be obtained office, together with terms of advertising and prices of the paper

HOW. GOLD IS FOUND ON THE KLON-

The Gold Fields of the Arctic Circle. or The Fortune-seeker's Guide to the Yukon Regions of Alaska and British America, with Maps, Diagrams and Illustrations. This new book, soon to be ready for patrons of THE TIMES, is fresh from the pen of a qualified writer who is personally familiar with the Klondyke country. It tells the whole story of the recent wonderful discoveries of gold in the far Northwest, and is described more in detail on the eighth page of today's issue, Everybody, whether or not he (or she) be afflicted with the gold fever, should have this indispensable book. It is a thick 12mo., in paper covers, and will be ready at the TIMES office very soon. Send or bring 25 cents and secure a copy. No extra charge for postage when sent by mail.

"BARGAIN WEEK."

Additional indorsements of this unique business project have been received by The Times from the Hub Clothing Company, the Thomas Drug Company and the Mammoth Shoe House, Olcovich Brothers, proprietors. The letters are of the same tenor, substantially, as those published on Saturday. The last named firm add to their indorsement the following pertinent suggestion:

"But indorsements alone won't bring about the desired result; we must act. We think the matter should be taken up right away by the Merchants' As-sociation and the Chamber of Com-

WHEAT AND PROSPERITY.

The price of wheat like that of other commodities, is regulated and determined by the laws of supply and demand. Bountiful production especially if it be accompanied by a decreased demand, will crowd the price down to a point which virtually extinguishes the amounts to the enormous average of profits of the producer. Such conditions have prevailed during the past three or four years. The harvests in | named. most of the wheat-producing countries have been generous, and a considerable surplus of the cereal in consequence ac- States were mortgaged beyond the cumulated. The total wealth of Illinois, whichstands at the head of the list among the prairie States, is placed at \$5,067,-000,000, or \$1325 to each inhabitant Ohio comes next, with \$3,952,000,000. or \$1077 to each inhabitant. "Three prairie farmers," says Mr. Mulhall, own as much wealth as four French, six German or thirteen Austrian

It appears, further, that the remark able growth of agriculture in- the prairie States has been accompanied by a corresponding growth of manufactures. "In 1850," he says, "there were 111,000 operatives in mills and factories in the prairie States; their average yearly earnings were \$270. and the average value of the product of each workman was \$1324. In 1890 there were 1,407,000 persons employed in manufactures, the average wage was \$478 per year, and the average value of the output of each operator was \$2247. Thus, while, by reason mainly of improvements in machinery the output of each operative was infortuitous, providential and unexpected, creased 70 per cent., the wages were increased 77 per cent.; the advantage crat friends are doing. Mr. Mulhall further shows that there are more miles of railway in these prairie States than there are in Russia, Germany, Austria and France together. The rate of taxation is low the amount of revenue collected in the twelve States in 1890 being \$182,-000,000, or at the rate of \$8 per head The average rate of taxation throughout the United States is \$9.10 per capita. POSSIBILITIES OF RUSSIAN CEREAL PRODUCTION.

An Associated Press 'dispatch state that C. G. Schindler, an engineer of the Department of Agriculture of St. Petersburg, and S. Gardenine, a wealthy rancher of the empire, hav during the last three months been traveling over the United States, examining agricultural machinery, with a view of introducing the more desirable forms of machinery into the grain fields of Russia. The object of the tour, it is added, is to "gather information about the grain-producing regions of America and ascertain what methods in vogue here can be practiced successfully in Russia."

The information contained in this brief dispatch possesses more significance than would appear at first glance. The grain-producing possibilities of Russia are as yet practically undeveloped. That great empire of the north is destined to become, in the not remote future, our strongest competitor in the world's cereal market. The vast steppes of Professional calamitvites are never Siberia are as yet uncultivated. But weary of reciting the woes of the agrithey are admirably adapted to culturist. The time is coming-and it may not be so far distant as some persons imagine-when the wheat supply of the world can be furnished from this source alone. Labo is comparatively cheap in Russia, and the wheat crop of the Siberian plains can be placed upon the market at prices which will practically defy com petition by the United States. Forewarned is forearmed. American farm ers can to some extent avoid the disastrous consequences of this threatened competition by so diversifying their products as to be practically independent of the threatened invasion There are other great staples which the world wants and will pay for liberally. Our farmers should study

He is directly interested in every governmental policy which fosters and develops the home market, and promotes

For this reason, among others, the American farmer is directly vitally interested in the maintenance of the policy of tariff protection. Upon this policy depends in a large measure the prosperity of commerce of commerce and industry depends the prosperity of the farmer. Thus all interests are in a measure interdependent, and all are vitally interested in the maintenance of a policy upon which the prosperity of all in so large a measure depends.

At the Churches Yesterday.

VER a thousand people gathered in Immanuel Church at the morn-ing service to hear the farewell wards of the pastor, Dr. W. J. Chichester, and to bid him godspeed on his journey to his new field. A brief ser-mon was preached by Rev. Dr. Norcross of Carlisle, Pa., who took as his subject, "The Influence of Christianity." The opening exercises were conducted by Dr. Chichester, who followed the sermon with a brief but most impressive farewell address, which he be gan by saying that he had never in his life preached a farewell sermon, yet he wanted to say a few words of good-by. That he had been often asked the se-cret of the successful work done in Immanuel Church, and in answer would say that there were four elements of the success; first, God's blessing; second, opportunity; third, hard work, and fourth, loyalty of the members to the Immanuel Church organi

In moving words the doctor thanked his people for their goodness to him during his years of ministry, and said that he felt his friends were not only in Immanuel Church, but in all the churches, and also among those outside of all church organizations. That he was going away with the kindest feelings toward every member of his

of all church organizations. That he was going away with the kindest feelings toward every member of his church, and that he believed he had their good feelings in return.

The doctor announced cordially that his home in Chicago would always be open to his friends as they went through and that he would always expect to see them at his church as well. Referring to the recent action of presbytery, the doctor stated that his conviction of duty with reference to the Chicago call had never faltered an instant from the time he had received it. That he knew that presbytery by its first action in retaining him, was in no sense arbitrary, but acted in all kindness and love, and afterward—it did not feel at liberty to interfere further with his individual convictions. That he was looking forward to his new work with much hopefulness and believed that with divine help he might be able to accomplish something for the Presbyterian church in Chicago. The doctor followed his remarks with an impressive prayer and then stepped forward in front of the pulpit, where he was joined by his charming wife, and as the whole congregation filed by, gave each a hearty handshake and a word of farewell. During the day he also spoke farewell words to the Sunday-school and the Endeavor Society.

Dr. Chichester and his family will leave at 11:45 o'clock this morning from the Southern Pacific station, and will go by way of the Denver and Rio Grande to Manitou Springs, Colo., where a month's vacation will be spent the leater part of September.

A Three-Sided Question.

A Three-Sided Question.

THE pulpit of Behtlehem Institutional Church was filled by Rev. E. R. Brainerd, spoke from a threefold text, Isaac xxx, 21; Acts, 3 Mark vi, 34, the subject being may I know what God wants me to do?" an intensely practical question for all Christians to think on—and one do? an intensely practical question for all Christians to think on—and one that may be considered as having three sides. First, conscience is God's voice in our hearts. No one is without conscience. The most careless youth or maiden, the man or woman, steeped in selfishness or greed for gain, the vilest sinner in the depths of iniquity and shame, all have with them the "still, small voice." We are not ready to do what God wants us to do, but we want to be ready to do what we want to do. We are ready for great things, but God calls us to do small things.

Second—God speaks to us through our convictions are

Second—God speaks to us through our convictions. Our convictions are formed by study, by reason. We must bring our convictions into harmony with God. When the captain of the company calls "Four right," the privates do net say, "Wait till I understand what the purpose is; where we are to be marched, whether this captain understands his business." No, so obeyer for he knows that the conthe obeys, for he knows that the com-mander has his plans laid. So God knows and will direct. We never can be Christians until we lay hold of sal-

ration.
Third—We must have our heart stirred. There is too much intellectual Christianity and not enough emotional devotion. Oh, if we could only feel the needs of the world as Christ did; could realize our obligation to our brother. So we see we have these three ways of receiving God's bidding, by conscience, by conviction and by compassions. Any one could move us to do for God, but when the three combine, they irresistibly press to work God's bidding.

. . . Great Teachers.

THE lecture at Blavatsky Hall in the morning was by H. A. Gibson on "The Purpose of Jesus." He "The histories of all nations and of every age record the fact of the apof great teachers called Christs, Saviours, Creators, etc. These are messengers, perfected men, who return to cheer and help reluctant men when the cycle of age has run its course and spent its force. Having lost the spirit of the former teacher in an incrustation of form and dogma, then new teaching is given corresponding to the capacity of the people to appreciate and put into practice. Jesus reiterated truths as old as man. Gathered around Himself a few students to whom He privately taught the greater mysteries of the science of the soul. When He had instructed these and established His teachings He departed, saying, however, He would return once more. As the race has progressed along intellectual and scientific lines we may presume that the next Great Teacher who was to come at 'the consummation of the age' will lead men are messengers, perfected men, who Teacher who was to come at 'the con-summation of the age' will lead men into the deeper truth of being and establish a scientific basis for ethics emphasizing the brotherhood of man."

Use of Wealth.

A THE English Lutheran Church the Rev. J. W. Ball preached yesterday upon the theme, "The Right Use of Wealth," from the text, Luke xvi, &, 9. He said in brief: "We are all stewards; yet how frequently we have proven unfaithful to our trust. God created man in His own likeness. He endowed him with all good gifts. Righteousness, blessedness and love were his. Distrust and disobedience entered. The bond was broken and man driven out into a world of thorns and thistles. Yet, notwithstanding our sin, God has entrusted to us the riches of His grace. Great and precious treasures He has committed to us, the commercial and industrial prosperity.

speaker dwelt upon worldly prudence as exemplified in the unjust steward, and "the man of the world," and upon heavenly prudence as it should be shown in the follower of Christ, but frequently is not.

The prudence of the steward lay in making provision for the future. The lack of wisdom in many a disciple lies in this, that though the term of his stewardship is fast passing, he is making no provision for an eternal future. The term of our stewardship is at best very uncertain. For some of us, it is The term of our stewardship is at best very uncertain. For some of us it is nearing the end. We seem to hear already the Lord's voice, "Thou mayest be no longer steward." We should be putting to a right use the riches intrusted to our keeping. We need no exhortation to "make friends of the mammon of unrighteousness" in the bad sense, but by means of the trust, which is in our keeping to win the eternal home, of which our Savior has said: "I go to prepare a place for you." That which ends in self must perish. That only is eternal which goes out of self into loving service of God and our fellow-man.

Dav's in the Illustrated American:] When men begin to patronize these dives they usually last about two years, and then they land in Bellevue Hospital, or are fished up out of the river. It isn't the character of the rum that is entirely responsible for the quick finish of their lives. Lack of sleep, exposure to the cold and wet weather, and unwholesome food also play their part. If you go into one of these morgues, the first thing you will notice will be a very large sign notifying customers that they can not loaf there. If any great attempt is made at conversation the bartender imloaf there. If any great attempt is made at conversation the bartender immediately makes some such romark as "You are talking through your hat," or "Don't get fresh because you happen to have the price of a drink," or "Shut up and take a sneak," etc. A most singular characteristic of the "bums" who patronize these "morgues" is that they are generally looking forward to some stroke of luck that will better their fortunes. They frequently assume most marvelous dignity. They discuss social and religious problems as if their opinions amounted to something, and they build to mendous air castles. A Bowery bartender of the better grade of saloons said that cologne spirits, and occasionally kerosene logne spirits, and occasionally kerosene oil, were used in the manufacture of 3-cent whisky. Unexpected Demand for \$18 Swamps a Syndicate of "Capi-talists"—A No-name Series the

The difficulties of travel to Alaska

are commonly supposed to lie chiefly at the northern end of the trip. But the Alaska Expedition Company and the Alaska Expedition Company and the Alaska Transportation Company have come to grief at this end of the route. Both concerns have been oc-cupying offices in the Byrne building and both have suddenly collapsed. The rock upon which the Alaska Expedition Company was wrecked was a demand for the payment of a bill of \$18 for printing the companys' prospectus. This nteresting document sets forth that he company was organized by "a syndicate of Portland, Or., and Los Angeles capitalists." The names of these "capitalists" are not given. The prospectus presents an alluring picture of the fortunes awaiting all who go to the fortunes awaiting all who go to he Klondyke and especially to patrons of the Alaska Expedition Company. For the sum of \$500 the company of-fers to carry the fortune-hunter to Dawson City and provide him with a complete outfit, and provisions for six months. The first steamer was sched-uled to leave San Pedro on September 15, but like the "capitalists" backing 15, but like the "capitalists" backing the enterprise, this steamer was name-Evidently the capitalists had not

the enterprise, this steamer was nameless.

Evidently the capitalists had not reckoned upon the necessity of paying the cost of printing this prospectus. It cost \$18. Kingsley, Barnes & Neuner, who did the work, grew importunate in their demands for payment, and finally took out a writ of attachment, which was levied Saturday afternoon by Deputy Constable Quinn upon the furniture in the company's office. Insamuch as most of the furniture in the office belongs to another man, and the rest is covered by a chattel mortgage, the prospects of satisfying the claim seem small. Aside from the nameless "capitalists," who modestly keep in the background, the only members of the company are C. H. Hastings and R. A. Newlyn. The latter is no stranger to the vicissitudes which attend all great enterprises and the discomforts of having his office furniture attached.

The embarrassment of the Alaska Expedition Company exercised an immediate and depressing effect upon the Alaska Transportation Company. Anotice appeared upon the door of its office Saturday afternoon, announcing that "The charter of the vessel to Dyea, Alaska, has been forfeited. Owners of tickets will receive their money at the bank on surrender of their tickets." As in the sister enterprise, the steamer is nameless, and, still more important, the bank at which owners of tickets are to receive their money, is also anonymous.

Despite the similarity in the objects, methods and fortunes of the two companies, C. H. Hastings strenuously asserts that they are entirely distinct and have no relation to one another. He declares that he knows nothing of the men interested in the Alaska Expedition Company. As to the Alaska Expedition Company, he asserts that of his friend, and an unknowan decompanies, C. H. of the men interested in the Alaska Transportation Company. As to the Alaska Expedition Company, he asserts that no fraud has been perpetrated, as no money has been received from any of the intending fortune-seekers. He says that the company expected to charter a steamer for \$10,000, but when it was found that one could not be obtained for less than \$25,000, the enterprise fell through. In view of the inability of the "capitalists" to pay a priniting bill of \$18, Mr. Hastings undoubtedly speaks truly when he says that \$25,000 was more than they could stand for.

Dreadful Paris.

Dreadful Paris.

An American girl visiting in Paris describes the fair Parislan awheel, and the picture she draws is a bit horrifying. According to the Waterloo Courier, she writes as follows:

"Blcycles, bicycles everywhere, and never a chance to cross the street. And such sights as one sees! Mon Dieu!—to be French—they are awful! Fancy a woman, all red bloomers and long limbs, without gaiters, and sometimes without stockings, too, and a big lace hat heaped with roses—that's what we are treated to in Paris, and there's no law against it, either.

"I have been here a week now, and I haven't seen a single skirt yet. All bloomers and knickerbockers and tights, and not pretty ones very often, at that. The bare-legged women wear little short socks just above their low shoes, and their limbs gleam out pink and shocking in the Paris sunshine. You gasp at first, but you get used to it in a little while, and don't even turn your head as the bare extremittes flash past.

You gasp at first, but you get used to it in a little while, and don't even turn your head as the bare extremities flash past.

"All the women bend over, and do not look well on their wheels in consequence. But they are daring riders, dashing in and out among the carriages and horses in the crowded boulevards and accidents are exceedingly rare. Some of the women lean so far over their handle-bars that from the rear you don't know whether the thing is human or not. As in London, the best and the worst ride, and they ride together side by side. The President's daughters, countesses, duchesses and the best of the American colony wheel to wheel, with painted cocottes in costumes that make you groan. Even the Faubourg St. Germain has bundled up its proud dignity, and gotten itself atop a wheel, and there you are.

"And it isn't to be wondered at, either, for nowhere in the world can be found loveller places for wheeling than about Paris."

It is Treason.

He said that the United States, if those attempts had been resolutely repelled by the Spanish government, would have withdrawn its extravagant provisions. [Boston Traveler:] A remarkable feature of Queen Victoria's reign is the great number of wars, "little and big," that have marked its progress. Scarcely a twelve-month has passed without finding England at war in some part of the world. Here is a list of the principal campaigns and expeditions: Afghan war, 1838-40; first Chinese war, 1841; Sikh war, 1846-46; Kaffir war, 1841; Sikh war, 1849; second Sikh war, 1848-49; Burmese war, 1850; second Kaffir war, 1851-52; second Burmese war, 1852-53; Crimea, 1854; third war with China, 1856-58; Indian mutiny, 1857; Maori war, 1860-61; more wars with China, 1860 and 1862; second Maori war, 1863-66; Ashantee war, 1864; war in Bootan, 1864; Abyssinian war, 1867-68; war with Bazotees, 1868; third Maori war, 1868-69; war with Looshasis, 1871; Zulu war, 1878-79; third Afghan war, 1878-80; war in Basutoland, 1879-81; Transval war, 1879-81; Expotian war, Var. 1878-79; third 1878-80; war in Basutoland, 1879-81; 1878-80; war in Basutoland, 1879-81; Transvaal war, 1879-81; Egyptian war, 1882; Zanzibar, 1890; India, 1890; Mat-abele wars, 1894 and 1896; Chitral cam-paign, 1896; third Ashantes campaign, 1896; second Soudan campaign, 1896.

It is the same story all along the line. Good crops, good prices, good times The farmer is paying off his mortgage and money is circulating freely. Santa Barbara grain-growers are jubilant and the San Joaquin Valley is rejoicing over the return of prosperity. The people of the San Joaquin have addi-tional cause for rejoicing in the building of the Valley Railroad, which has forced the Southern Pacific to relax its larcenous grip on everything in sight.

The "authorities at Washington" have solemnly directed that the Supreme Court of New Mexico be called upon to decide whether the Rio Grande is a navigable stream a hundred miles above El Paso. After the justices shall have walked across the river-bed and brushed the dust off their boots, they doubtless will render a decision in accordance with the fact. Then they may go up to Colorado and ascertain whether Pike's Peak is a mountain or a hole in the ground

PROSPEROUS FARMERS.

Tulare's Wheat Crop is Paying Off Mortgages.

Editor W. H. Gilstrap of the Tulare News is in the city, accompanied by his family. Mr. Gilstrap has much faith in the future for Visalia, now that the Valley road has reached that place. "Visalia has suffered much from the unreasonable exactions of the Southern Pacific Company," said Mr. Gilstrap last evening, "but now that the Valley road has entered the field the Valley road has entered the field in competition we see some light ahead. A month or two ago the only rail connection we had with the outside world was afforded by the little jerk-water branch line which connected with the Southern Pacific at Goshen. Since the entrance into Visalia of the Valley road became assured, the Southern Pacific has absorbed the branch, and is now giving us a strictly first-class service. "The farmers in our section seem to be unusually prosperous this year, and from what I can learn many mortgages will be paid off out of the proceeds of the coming crop. The wheat crop in the vicinity of Visalia will be unusually heavy, and with our immense acreage and good prices we are looking forward to a very profitable season."

The signal to start was not given un til nearly twenty minutes after the appointed hour. At 12:45½ the sloop King Fisher darted across the line under full sail and was well out to sea before the Nenie cleared the point a minute and a half later. The remain-ing yachts immediately righted about and followed in pursuit, the Wild Pigeon meeting with much difficulty in her repeated attempts to pass the

A delay of several minutes in the departure of contesting yachts resulted from a dead calm which set in just as the signal was about to be given. The accordingly granted an extension of seven minutes time on the start to accommodate the boats occupying unfavorable positions. King Fisher had hardly passed the line, however, before a friendly wind sprang up and half a dozen of her companions spurted over the line in rapid succession.

The start was decidedly pretty, although uneven, the yachts being divided into two distinct groups, with the first assembly fully one and one-half miles in the lead.

The J. Willey passed the second buoy with ease, with the San Pedro close at her heels. The same relative order was maintained up to the third buoy, the passing time being: J. Willey, 1:384; San Pedro, 1:38; King Fisher, 1:384; Restless, 1:41½; Ocean Wave, 1:41¾.

Wild Pigeon, the last to start, was the last to pass buoy No. 3, although she had succeeded in making a decided gain upon her leaders after the second buoy once had been passed.
The J. Willey was a pronounced favorite from the start, with everything in her favor until after her arrival at the third buoy. After that point had been well cleared she made a port tack and continued upon that course for a distance of two miles when she shifted to the starboard. The other yachts hugged the wind closely, tacking occasionally for short distances only. The J. Willey lost much time in maneuvering to catch the wind, and The J. Willey lost much time in maneuvering to catch the wind, and finally gave way to the Restless, which maintained the lead throughout the remainder of the race. The J. Willey clearly tried to beat out on one tack and return on one leg, but she got seventh place in the wind-up for her pains. Restless made a fine showing in the start, carrying her mainsail, jib, club topsail and flying jib. Much time was lost, however, in an attempt to get to the windward. Defender, Jr., had a very difficult start. Immediately after the signal to start she holsted her flying jib, but the wind was unfavorable and she drifted about for several minutes. Defender entered her first race yesterday, and, everything considered did robly.

hoisted her flying jib, but the wind was unfavorable and she drifted about for several minutes. Defender entered her first race yesterday, and, everything considered, did nobly. Although she carries an immense topsail it was not brought into service, the captain deeming the wind too high.

At exactly 3 o'clock the Restless pressed her nose across the home line, making the trip in two hours and nine minutes, her sails being close hauled over the entire last leg. The distance covered was nine nautical miles.

The other yachts passed the judges' boat in the following order, the total trip time also being given: Boa Vista, 2:46%; King Fisher, 2:28; Eureka, 2:46%; King Fisher, 2:28; Eureka, 2:46%; Lyupiter, 2:31; Nenie, 2:13%; Fayal, 2:06%; Flying Bird, —; San Pedro, 2:15%; Wild Pigeon, 2:42½; Early Bird, 2:34; Defender, Jr., 2:19.

Prizes were awarded as follows: Flying Bird, 30; Restless, \$25; Nenie, \$20; San Pedro, \$15; Fayal, \$12.50.

Other prizes, seven in number, ranged from \$10 down to \$1.

'Twas a pretty race throughout. The J. Willey was favorite at the The J. Willey was favorite at the start and continued as such until her two-mile tack from the third buoy. Defender, Jr., would have crossed home line fully three minutes earlier had she not been fouled by the Eureka, which poked her nose across the Defender's bowsprit, doing considerable damage.

The Restless stayed closest to the wind of any boat in the race.

Col. T. C. Marceau, Frank J. Thomas and T. E. Gibbon acted as Judges, C. A. Sumner filling the position of general manager of the regatta.

MUSSEY'S RIDE.

He Goes too Fast the First Hour to Last One Hundred Miles.

Yesterday morning was the time set for Ralph D. Mussey to ride a hundred miles against the Coast, and also the American record. The smooth quarter-mile track at Athletic Park was the scene of the record ride, and the pacers were mostly members of the East Side Cycling Club, of which Mussey is also

The day was fair and cool when the The day was fair and cool when the ride began, about 8 o'clock, and the light wind did not worry the long-distance rider, as his pacemakers cut the wind for him. Mussey failed to get the hundred-mile record because he tired out before reaching forty miles, and only continued up to the end of the fiftieth, so as to establish local and Southwestern record for that distance. Mussey could have broken the Coast record, still held by Fay Stephenson, and made on this same track, if he had continued, as a 2:52 gait only was made for the whole distance when that record was established and Mussey was under this record when he stopped.

Portland Saturday and yesterday, the opinion among local racing men has changed, and there is no more sneering about the "accident" of his winning here on May 30 and July 4. The Otay boy has been held too lightly in the esteem of some local critics, and his winning from the cracks on Saturday has opened their eyes.

RIVERSIDE RACES.

Annual Admission Day Meet at the The Riverside Wheelmen will have very interesting annual meet this year and a long list of events has been ar ranged, beginning with the annual thirteen-mile road race over the Magolia avenue course.

The track events consist of a mile

race for novices, with gold and silver medals; one mile 2:30 class for ama-teurs, with three prizes; a mile open amateur race with unset diamond for first prize, gold watch for second prize first prize, gold watch for second prize and suit case for third prize; two-mile amateur handicap with two watches for prizes; a two-mile handicap for gentlemen of color; five-mile team race between Elsinore, Perris and San Jacinto riders, three men to a team and three suits of clothes for prizes to winning team; five-mile team race for ning team; five-mile team race for messenger boys, three suits of clothes the prizes, and the annual twenty-five mile team race for the \$250 East Side trophy cup. There will also be a coasting match.

In the thirteen-mile road race there will be three time prizes of small value and a dozen or more prizes for place. There will be a seven-minute handicap on the road race, the limit man leaving the tape on Eighth street at 9:30. The afternoon races will begin at 2 o'clock. The Riverside track is a third of a mile on Fremont Heights, and a good track with most excellent seating capacity. LA.W. rules and sanction will govern the meet, and entries for the race close on September 3, with Isaac S. Logan, secretary of the Riverside Wheelmen, Riverside, Cal.

It is expected that the South Side Cycling Club of Los Angeles and a club at Santa Ana, lately formed, will have teams in the big cup race.

Wheeling Notes.

As the country roads of Southern California are at their worst just at present, the amount of touring and

present, the amount of touring and long-distance road riding is much less than it was a fortnight ago, and only those are riding who cannot avoid the hard work.

The Cahuenga Pass road is still being cut to pieces for want of sprinkling. Last year the county spent several thousand dollars regrading this piece of roadway, and much if this investment will be wasted if the road is not sprinkled and taken care of better.

The Crescent Cycling Club was to have held its annual five-mile road race yesterday morning, but through several accidents to its best racing men, it was found best to postpone the men, it was found best to postpone the event to a later date.

Pasadena will have a blue ribbon race meet late in the month. The Pasadena track is the best dirst track

on the Coast.

The ten-mile open handicap race on the Glendale course will be run on September 19, and the start will probably be in the morning. The East Side Cycling Club is promoting the event, and will put up many prizes.

ROGERS FINALLY GIVES UP THE

When She Sent Back the Wedding Ring Without a Message, He Lost Hope-Work for the City

PASADENA, Aug. 15.—[Regular Correspondence.] Mrs. Elmira Lewis, the mother of Netice Lewis Rogers, said a few days ago that Rogers would soon tire of trying to find his missing wife, and finally coming to the conclusion that. Nettle felt she had made a mistake would give up his search for her, and would eventually apply for a divorce on the ground of desertion.

The first part of her statement has already manifested itself as true, though in a much shorter time even than the sanguine mamma could have hoped for. Yesterday afternoon a messenger called at the hardware store where Rogers is employed and delivered a package to him. Upon opening the package, Rogers found two rings, one the engagement ring he had given to Nettle, and the other the wedding ring. There was not a word to console him—nothing but the rings. That was a little too much, and Rogers now says should he meet Nettle on the street he would not recognize her unless she manifested an inclination to speak to him. "Had she said to me that she felt that she had made a mistake in marrying mo, said Rogers, "and that she felt that she would not have all the luxuries she desired, I would not have all the luxuries she desired, I would not have all the luxuries she desired, I would not have all the luxuries she desired, I would not have all the luxuries she desired, I would not have all the luxuries she desired, I would not try to find her or to see her. I shall not try to find her or to see her. CITY TRUSTEES. CITY TRUSTEES.

The members of the City Trustees will spend most of the dav at the City Hall tomorrow, as it will be the last meeting of the Trustees acting as the Board of Equalization in the morning, and the regular meeting of the City Council in the afterpoon. The old Board of Equalization will have one or more protests to act upon in the forenoon, while in the afternoon aside from the usual routine business, the protestants against a sewer on the East Side will probably have a hearing, and as there are very many property-holders who think this no time to incumber them with the expense of building a sewer, there will probably be a lengthy meeting of the Council.

Reception Given to the Soldiers of Co. M-The Boys Bring Home the Long Beach Medal Once More. Riverside Brevities.

RIVERSIDE, Aug. 15.—[Regular Correspondence.] It has been four days since the Supervisors of Riverside county voted to accept Frank A. Miller's proposition for the lease of a courthouse at a monthly rental of \$350 for a term of five years dating from June 1 next, and dissatisfaction is just beginning to crop out on the part of Populists, Democrats and Popocrats. The Board of Supervisors is composed of two Populists, two Democrats and one Republican. By a vote of 4 to 1 Mr. Miller's proposition was accepted and Mr. Miller has always been a very lively sort of a Republican. Hence numerous tears on the part of the constituency of the opposing parties, whose representatives on the board held a very decided balance of power. It is alleged that the acceptance of Mr. Miller's bid, which means the erection, next summer, of a magnificent new tourist hotel on the site of the Glenwood, will greatly enhance the value of property owned by the Republicans who were most active in the last campaign, and this is the secret of the openly-expressed disapproval of a certain element, who regard the whole deal as a purely political transaction. The great majority of Riversiders, however, irrespective of party, are pleased with the action taken by the Supervisors, on the ground the steep of the form of the property owned by the Republicans who were most active in the last campaign, and this is the secret of the openly-expressed disapproval of a certain element, who regard the whole deal as a purely political transaction. SAN great majority of riteristers, nowever, irrespective of party, are pleased with the action taken by the Supervisors, on the ground that it insures, not only suitable, modern and conveniently-located quarters for the county officials, but guarantees the supplying at an early date of a long-felt want in the shape of an up-to-date hotel, which in itself will work material advantage to the entire section.

RECEPTION TO THE BOYS.

The boys of Co. M, N.G.C., were given a right royal welcome home Saturday night from the Santa Monica encampment, where they had the highest honors in the battalion conferred upon 'them. Their return was made the occasion of a general celebration. The City Band met the company at the Santa Fé station, and, accompanied by a big crowd of enthusiastic citzens, the line of march was taken up to the barracks, where Sheriff Johnson got off a highly-complimentary speech of welcome. Sergt. Meacham, who won the Last medal by scoring 67 out of a possible 75 points, was called to the front and highly commended by Capt. Bason.

The Long Beach medal was also won, for RECEPTION TO THE BOYS.

RIVERSIDE BREVITIES. The building of the new Glenwood will mean much for Seventh street. Mr. Heilman of Los Angeles is seriously considering the early erection of a handsome business block on his property between Main and Orange streets, and the proposed new Southern Pacific depot seems to be a not very distant possibility.

POMONA.

POMONA, Aug. 15.—[Regular Correspondence.] Some years since the Southern Pacific Railroad entered into an agreement with the Pomona Chamber of Commerce to maintain a park on the company's laad near the depot here, providing the city would plant the ground and care for it for a certain time. The citizens performed their part of the contract and the company assumes the care of the park in the future. The water rate has recently been increased from 31 per month to \$2\$, however, and this great burden on the company has prompted it to request the City Trustees to bear half the expense, and this great issue has awakened a lively controversy.

At the experimental station some very important tests are being made, that with the control of the plants later than is usual in California, and expresses a belief that he will get plant being experimented with is cotton, and several fine specimens have pods just forming. SAN DIEGO COUNTY.

SAN DIEGO, Aug. 15.—[Regular Correspondence.] Today will wind up one of the most successful camps ever held by the Southern California Veterans' Association. Tomorrow (Monday) the tents of the camp will fall and the remaining veterans will leave for their homes.

Saturday. evening the soldiers and hundreds of the town's people assembled in the plaza, after the evening's entertainment at social pavillon, to attend the camp fire. A huge pile of boxes in front of the commander's headquarters was ignited, and as the blaze licked up the sides of the dry timber, comrades mounted a wagon and in the light and warmth of the bon fire told stories of the war and sang songs to the delight of the thousands of spectators.

Earlier in the evening, in the big tent, Commander Bell was presented with an elegant gold badge by Comrade Kutz on behali of the association, in appreciation of his valuable services toward the success of the

COMING TO CALIFORNIA.

SAN BERNARDINO, Aug 15.—[Regular Correspondence.] The bringing of the Suman flouring mill, a four-story building, to this city from Colton, with all the machinery in place, has been duly heralded. The building has been located on its new foundation, the supply of water brought around in a manner to give it the full power, and the wheel that is to turn all the machinery has been ordered from Hanover, Pa. This wheel is four feet wide, 35 feet in diameter, 110 feet in circumference, and weighs 24,000 pounds, and will run on ball bearings. It is on the way, and is expected in about a week. It is thought ten days after its arrival will see it put in shape for work. A gentleman from the East, who has used the Hanover wheels, on taking a look at the supply of water and making inquiries about the wheel, says there will be from fifteen to twenty horsepower more than is necessary to run the mill. He wished to engage the extra supply for an ice plant, but Mr. Suman preferred to use it in another direction. The latter is laying plans to put in a creamery, as he will have plenty of power to spare, the best of cool artesian water right at the door, and a location only three-fourths of a mile from the great Waterman ranch, which the owners expect soon to stock with 600 cows and run a dairy. With these surroundings the estatblishment of a new creamery seems almost a foregone conclusion.

SQUIRREL INN HABITUES. COMING TO CALIFORNIA. Many letters are now being received fro various portions of the East indicating to the writers want to come to California. various portions of the East indicating that the writers want to come to California. One of the most important of these letters has been received by M. C. Turner of this city. It comes from Western New York from a large real estate dealer who has sub-agents all over the country. The letter says: "I mail to you a copy of yesterday's News. You will see what great losses our farmers are sustaining from the great rains prevailing ithe last month. Nothing like it ever experienced in the country before. It has disheartened thousands of our people in this State. This makes the third year of failure, from various reasons. There is a determination on the part of many to make a change of residence. I predict one of the greatest movements ever known. Most all of these people have means accumulated previous to three years ago, and are now determined to change while they have it within their power. They feel that the chances here are too uncertain and they are ready to emigrate. The railroad people will join in some intelligent plan to transport them. Immediate action is necessary. These are not sightseeing parties, but actual settlers, and just the class needed to build up the locality they may select. Within three days I can put all my cooperative agents into the field, sixty in number, who can distribute any matter required. I think four or five large excursions can be gotten out during the next six months."

Other letters equally as strong as the above have been received from other sections of the country beyond the Rockies, thus showing that many residents of the East are making definite plans to come to California.

EARLSTON IN JAIL.

Richard Earlston, the aeronaut, was arrested this afternoon on telegraphic orders SQUIRREL INN HABITUES.

The popular club resort, Squirrel Inn, was the scene of a large and joyous gathering Saturday and over Sunday, being filled to its fullest capacity with members and their guests. The special occasion was the annual election of streets of the Arrowhead Mountain Club, with Szrusual festivities common at such an event. The election took place Saturday evening, and resulted in the choice of the following: Col. Adolph Wood, president; Judge F. W. Gregg, vice-president; Seth Marshall, secretary and treasurer. The board of directors will consist, in addition to these three, of William Stanton of Pasadena, and J. T. Schuyler of Los Angeles.

COLITON LIME AND CEMENT. COLTON LIME AND CEMENT.

After a varying vicissitude of prosperity and depression, the Colton cement works are again to be opened, this time under the management of M. A. Murphy. Forty men will be placed on the pay roll this week if they can be secured. The company has an order for 10,000 barrels of lime and 10,000 barrels of cement, the former to be delivered first. This, with the cannery, which is running full time on peaches, will make Colton a bustling place, where at least a ripple of the wave of prosperity will be seen.

SAN PEDRO, Aug. 15.—[Regular Correspondence.] Today was a lively one for the police. Eight arrests were made, seven of which were on charges of disturbing the peace by fighting, while another delegate for puglistic honor is still at large, with a warrant out for his arrest in the hands of Deputy Constable Hult.

Early in the afternoon two unknown Los Angeles visitors became involved in an altercation on Front street. Blows and their subsequent arrest followed. About this time another "Jone Doe" was found lying in the street drunk and taken off to fail to recuperate. Five o'clock found a free fight in progress in Lewis Entler's saloon on Front street, and here four fighters were added to the number already in durance. Three of these, Spencer Stevens of Long Beach and Fred Wood and George Lowe, both of Los Angeles, were released on the payment of \$10 cash bail by their friends, but the fourth, name unknown, also of Los Angeles, remained a guest of San Pedro.

The shanty was formerly used as a barn, but has recently been occupied by J. Healy. The flames galned much headway before the department arrived and the shanty was entirely destroyed, although the contents were saved. The loss amounted to about \$100.

producers.

A new site for further oil development has been secured by Parker & Thurston. They have already drilled four or five wells south of Bernard and Adobe streets, and are having a drilling rig put in on the north side of Cellege street. 400 feet west of Adobe street. This site is in rich oil-bearing sand.

The Rex Oil Company still has five drilling rigs actively engaged in oil development in the eastern extension, and each week adds one or more wells to its numerous producers.

Tom O'Donnell is making fair progress in the development of his oil lots east of Yale street and south of Bernard street.

Ramish & Marsh are among the busiest developers in this new extension, and are already the possessors of producing wells, although they came into the field a short time ago. They have two drilling rigs in service.

The new Somes well is a good producer. It is situated north of Bernard and west of Yale street.

Nettleton & Kellerman are developing their oil lots as rapidly as the work can be done. Their new pumping plant on Adobe street north of Bernard street is in operation, having hitched on to its first well the latter part of the week. Several wells will be pumped by it as soon as they are completed and tubed.

Alderson & Cochran's new well, near the brick yard, will soon be ready for the tubing.

The Slocan Oil Company has broken ground for three or four new wells, and has a drilling rig at work at one of its new sites.

Darcy, Chadwick and the Brunton brothers have two rigs at work in the Darcy acreage. This syndicate will soon have a large number of wells in active operation. Twenty-eight wells will probably be drilled by it before development is suspended.

Robinson & Summers have started the drill at their site at the northeast corner of Pearl and College streets. Four of five wells will be drilled upon the lots isse asset of Pearl street.

The Hillside Oil Company will soon have well No. 2 ready for tubing. Well, No. 1 is a good producer.

Drilling operations are being prosecuted by the brick company at the top of the hill south of its works.

The Capitol Milling Company is still developing its acreage west of Adobe street, swith of Bernard street. They have drilled and tubed two heavy producers, and are still busily engaged in work upon their oil lots.

A rig of the Rex Oil Company is still fishing in the quadrant, on the hillside south and west of the Belmont avenue fire engine house. Workmen heir disadvantage.
San Franciscans understand the local have been engaged in the prosecution of oil development at this site for sev-

their disadvantage.

San Franciscans understand the local situation, and are moving slowly in the matter of providing an oil harbor of refuge for Southern California's distressed barks of overproduction. The wooden tankage in the Los Angeles field is estimated at 145,000 barrels, but a surplus of more than a thousand barrels a day has been accumulating for some time, without any steps being taken to relieve the situation. The present output is not less than 100,000 barrels per month, while the consumption falls below 75,000 barrels for the same period. The Santa Fé's tankage of about sixty-five thousand barrels is full to the point of overflowing, and that company is in such position that it need not-purchase a barrel of oil for sixty days, even if its lines were operated to the full capacity of the rolling stock. The Southern Pacific is burning but little oil, and is said to be satisfied with a storage reserve of 5000 barrels. The Los Angeles Railway Company, Pasadena and Pacific Railway Company, and the Traction Railway Company are now producing a large part of the oil consumed by them, hence are uncertain purchasers in the local market.

A little exploitation is yet being done. During the past week a derrick has been erected a short distance east of the Baptist College, and experimental development will soon begin. The Willing should be present with financial success, and has removed their energies to the eastern extension has aparently sheen engaged in the prosecution doe il development at this site for several menths.

THEY ARE FISHING.

The western extension has aparently seen its best days of oil development. There is not a single rig at work in new territory, and two or three strings of toles are trying to overcome difficulties encountered several weeks ago. There weeks ago. The week a part of the same period. The Hall well, east of Bonnie Brae street, and 400 feet south of Ocean View avenue, will probably be classed among abaridoned wells before the present month draws to a close. None of the wells on the south side of Ocean View avenue are profitable, and the best wells
